

HANDI® 450 DOUBLE FACE WATERPROOF

Analog clock HANDI® Double face.
Aluminium case.
Distance of legibility : 35m.

Time setting

The professional HANDI® clocks can display the same information, by synchronizing through a master clock or a time server.
On pulse version, the time setting is manual.

Specification

Power supply	Battery (1 year autonomy) Lithium battery (5 years autonomy) 230VAC POE (Power Over Ethernet)
Certification	CE, EN 60950, EN 55022, EN 55024
IP	IP54
MTBF	85 000 hrs
MTTR	15 min
Operating temperature	Without lighting : -20° to +50°C With lighting : -30° to +50°C
Weight	See us
Dimension	Diameter 441.2 mm Thickness : 163.5 mm Bracket supports : see schemas below

Display

Arabic numerals screen printed in black.
Black lacquered hands.
Trade mark and logo GORGY TIMING screen printed on the dial.

Key features

- **Fast but approximate reading of time.**
- Flat aluminium case.
- Acrylic front cover (Polymethyl methacrylate).
- Wall mounting or ceiling mounting with bracket or flag.
- Time setting by synchronization source.
- Autonomy of five years provided by a lithium battery and 10 years optional (except version Impulse) .
- Supervision alarm through FSK protocol for AFNOR version and through ASCII for the ASCII version.
Message of alarms: wrong hand position, no synchronization...
- LED lighting

Remote management (on NTP version)

Remote configuration and time setting via WEB interface.
Automatic time zone choice and daylight saving time change.
Supervision via HTTP, SNMP, Telnet. "GT Network Manager" (Windows® NT/XP/2000/Vista (32 bits) /Windows 7).

Synchronization inputs

- **Standalone quartz time base synchronizable :**
 - DCF (Europe)
 - AFNOR NFS 87500/IRIG B
 - NTP Ethernet 10/100 base T
 - DHW 869.525 Mhz
 - Wi-fi (IEEE 802.11 B/G standard).
 - ASCII : RS 485
- **Pulses version :** parallel reversed minute receiver 24V.

HANDI[®] 450 - DOUBLE FACE WATERPROOF
